LOCATOR F-Tx™
A NEW WAY TO THINK ABOUT FIXED FULL-ARCH RESTORATIONS.

LOCATOR F-Tx IS A SIMPLIFIED, TIME SAVING SOLUTION for fixed full-arch restorations with no compromise to prosthesis strength or esthetics. Optimized for efficiency and chair time savings compared to conventional screw-retained systems, it features a novel, patent-pending “snap-in” attachment that eliminates the need for sub-gingival cement or screw access channels. An exceptional solution for immediate provisionalization, the fully integrated system accommodates the full range of final restorative options including all acrylic, metal-reinforced acrylic, PFM, and all zirconia frameworks. Truly unique and cutting-edge, LOCATOR F-Tx is sure to deliver satisfaction for both the patient and clinician.

SIMPLICITY
Easy “snap-in” attachment and minimal components streamline procedures, while the unique design of the LOCATOR F-Tx Fixed Attachment System accommodates divergent/convergent scenarios up to 40 degrees between implants without the need for angled abutments.

STRENGTH AND ESTHETICS
No cylinders, screw access channels, and screw heads to compromise esthetics or weaken the prosthesis. The ability of each Denture Attachment Housing to pivot on the Abutment up to 20 degrees in any direction allows the housing to be positioned into the ideal location for the prosthesis.

TIME SAVINGS
Significant chair time savings over conventional techniques for fabrication of an immediate provisional prosthesis. Patient visits are also expedited and simplified with quick, easy removal of the prosthesis during follow-up visits for final impressions and try-ins, as well as future recall and maintenance visits.

SCREW RETAINED PROSTHESIS WITH SCREW ACCESS CHANNELS

LOCATOR F-Tx PROSTHESIS MAINTAINS INTEGRITY AND ESTHETICS

LOCATOR F-Tx™ FIXED ATTACHMENT SYSTEM

WE’VE MADE FIXED FULL-ARCH RESTORATIONS A SNAP.
NO SCREWS. NO CEMENT. NO COMPROMISES.

LOCATOR F-Tx™ A NEW WAY TO THINK ABOUT FIXED FULL-ARCH RESTORATIONS.
What if screws or cement were no longer needed to attach a fixed prosthesis to the abutments?

What if you could shorten and simplify the treatment appointment?

What if the patient’s esthetics and comfort were maximized?

These questions were at the foundation of the design and development for the unique and innovative LOCATOR F-Tx™ Fixed Attachment System from Zest Dental Solutions. By leveraging our many years of expertise with the LOCATOR® Attachment System and our understanding of full-arch solutions for edentulous patients, we strived to create a simpler, more efficient system for FIXED full-arch implant restorations.

Fixed for the Patient. Easily Removed by the Clinician.

Welcome to LOCATOR F-Tx
LOCATOR F-Tx™
A NEW WAY TO THINK ABOUT
FIXED FULL-ARCH RESTORATIONS.

LOCATOR F-Tx IS A SIMPLIFIED,
TIME SAVING SOLUTION for fixed
full-arch restorations with no compromise to
prosthesis strength or esthetics. Optimized for
efficiency and chair time savings compared to
conventional screw-retained systems, it features a
novel, patent-pending “snap-in” attachment that
eliminates the need for sub-gingival cement or
screw access channels. An exceptional solution
for immediate provisionalization, the fully
integrated system accommodates the full range
of final restorative options including all acrylic,
metal-reinforced acrylic, PFM, and all zirconia
frameworks. Truly unique and cutting-edge,
LOCATOR F-Tx is sure to deliver satisfaction for
both the patient and clinician.

SIMPLICITY
Easy “snap-in” attachment and minimal
components streamline procedures, while the
unique design of the LOCATOR F-Tx Fixed
Attachment System accommodates divergent/
convergent scenarios up to 40 degrees between
implants without the need for angled abutments.

STRENGTH AND ESTHETICS
No cylinders, screw access channels, and screw
heads to compromise esthetics or weaken
the prosthesis. The ability of each Denture
Attachment Housing to pivot on the Abutment up
to 20 degrees in any direction allows the housing
to be positioned into the ideal location for the
prosthesis.

TIME SAVINGS
Significant chair time savings over conventional
techniques for fabrication of an immediate
provisional prosthesis. Patient visits are also
expedited and simplified with quick, easy removal
of the prosthesis during follow-up visits for final
impressions and try-ins, as well as future recall
and maintenance visits.
The first fixed full-arch restoration without compromise.

**Secure Snap-fit Design**
This revolutionary, patent-pending retention system works similar to a ball and socket, allowing the Denture Attachment Housing to securely snap into place and then pivot to the desired position. Once in place, it’s fixed for the patient, and can easily be removed by the clinician during hygiene and maintenance visits.

**Revolutionary Prosthesis Removal System**
Removing the LOCATOR F-Tx prosthesis is quick and easy by using simple hydraulic displacement to disengage the prosthesis from the LOCATOR F-Tx Abutments.

**Simplified Angle Correction/Stress Free Passive Fit**
- The LOCATOR F-Tx Abutment features a unique, spherical coronal geometry which allows the Denture Attachment Housing to rotate in any direction and correct up to 40 degrees of convergence/divergence between two implants eliminating the need for angled abutments.
- Chair side processing procedures at final prosthesis delivery ensures a stress free passive fit.

Denture Attachment Housing pivots 20 degrees in any direction allowing for the Housing to be positioned into the ideal location for the prosthesis.
INTRODUCING LOCATOR F-Tx™.

THE FIRST FIXED FULL-ARCH RESTORATION WITHOUT COMPROMISE.

DENTURE ATTACHMENT HOUSING

- Denture Attachment Housing is threaded internally to accept a PEEK Retention Ball that snaps into the LOCATOR F-Tx Abutment.
- Features an anodized pink finish for improved esthetics.
- Aggressive grooves and flats limit vertical and rotational movement.
- Denture Attachment Housing is passively picked-up in the prosthesis via a chair side technique.

RETENTION/PROCESSING BALLS

- PEEK Retention Balls are available in low, medium and high retention levels based on the needs of the case.
- A Processing Ball comes pre-inserted with the Denture Attachment Housing, and an additional Processing Ball is included, both are used for provisionalization and laboratory procedures.

ABUTMENT

- Unique, spherical coronal geometry allows the Denture Attachment Housing to correct up to 40 degrees of convergence/divergence between two implants and pivot in any direction to position the Housings into the ideal location for the prosthesis.
- DuraTec™ Coating provides a hard, smooth and wear-resistant abutment exterior with an esthetically pleasing gingival tone.

ALL-IN-ONE PACKAGING

- LOCATOR F-Tx features all-in-one packaging that is sterile and includes everything you need. Abutment (with cap to deliver the abutment to the implant site), Denture Attachment Housing with pre-inserted Processing Ball, an extra Processing Ball, as well as one Blue (Low), Tan (Medium), and Green (High) Retention Ball.
